#### PREFACE.

THE collections of Egyptian Antiquities of which some account is given in the following pages were acquired by Lady Meux in 1882, 1895-6. They contain a number of very important objects, among which the following are worthy of special note: -(1.) Limestone slabs from tombs of officials who flourished in the IVth and Vth dynasties, and four fine sepulchral stelæ inscribed with hymns to the Sun-god from Akhmîm. (2.) The rectangular wooden coffin of An-heru, inscribed in hieratic with Chapters from the Book of the Dead. This coffin was made in the XIth dynasty, about B.C. 2600, or earlier, and belongs to the class represented by the Coffin of Āmamu in the British Museum. (3.) A magnificently painted coffin of an unnamed member of the confraternity of the priests of Amen-Rā at

Thebes. (4.) The mummy and coffin of Nes-Amsu, the second prophet of the god Amsu, and prophet of the god Khonsu at Apu (the Panopolis of the Greeks, represented today by the modern town of Akhmîm in Upper Egypt), about B.C. 350; they were presented to Lady Meux in 1886 by the late Walter Ingram, Esq. The mummy is interesting as an example of a body carefully preserved by the use of bitumen; the coffin is a good specimen of the work of the funereal craftsman of that period, and its value is enhanced by its perfect condition. There is, moreover, every reason for believing that Nes-Amsu was an ancestor of Nekau, whose sepulchral stele is preserved in Lady Meux's Collection (see No. 51). designs and colouring and subject matter of the inscriptions recall the work of a much older period, and prove that, in spite of the corrupting influences of the Greek and Persian civilizations, and the imposition of alien manners and customs upon Egypt, and the decay which was slowly undermining her ancient religion, the hand of

the artist had not lost its cunning, that the worship of the gods of olden time still held sway, and that the belief in the resurrection of a spiritual body was no vain thing even to the educated Egyptian. In the coffins of An-Heru, and of the priest of Amen and of Nes-Amsu we have three of the finest examples of this class of object belonging to the Ancient and New Empires and to the Ptolemaïc period respectively. (5.) Double seated limestone figures of Neb-sen and Nebt-ta, XVIIIth dynasty. (6.) Black granite kneeling figure of Amen-[em]-apt, a scribe, XVIIIth dynasty. (7.) Black granite kneeling figure of Iupa, the scribe and architect of the Temple of Amen-Rā at Thebes during the reign of Rameses II., about B.C. 1330. (8.) Head of a black granite statue of Rameses III., King of Egypt about B.C. 1200. (9.) Painted plaster heads with inlaid eyes, of the Roman period, about A.D. 300. (10.) Wooden boat containing figures of the captain and his crew, consisting of one steersman and twenty rowers, belonging to the Ancient Empire. (11.) A

large bronze seated figure of the goddess Sekhet. (12.) A fragment of a wooden box inlaid with ivory, inscribed with the rarely found prenomen and nomen of Rameses X., King of Egypt about B.C. 1150. (13.) A hypocephalus made for Shai-enen, the son of Nes-Nebt-het. (14.) A collection of about eight hundred scarabs and amulets from Abydos. (15.) A bronze libation bucket made for Shashanq, the son of Thehet-Tehuti. This fine specimen of bronze work was probably a votive offering to the deceased by his daughter Nit-aqert (Nitocris). (16.) A blue glazed faïence figure of Venus Anadyomene. (17.) Alabaster vase of Pepi I, King of Egypt about B.C. 3233, etc.

The number of Egyptian Antiquities preserved at Theobald's Park is about eighteen hundred, and the proportion of first-rate objects of interest is very considerable.

## THE FUNERAL OF AN EGYPTIAN.

THE ancient Egyptian monuments and the hieroglyphic inscriptions cut upon them show us that the Egyptians, from the earliest dynasties, took the greatest possible care to preserve the bodies of their dead from destructive agencies and decay in the tomb. They learnt, at a very early period, that bodies laid in the earth which forms the soil of Egypt, were rotted by the infiltration of the waters of the Nile, and that to preserve the bodies of their dead from the attacks of birds and beasts of prey, it was necessary to bury them in tombs hewn out of the solid rock in the mountains, on the right and left banks of the Nile. They attempted to arrest the decomposition of the body into its natural elements by the use of drugs, balsams, and aromatic spices; and there is no doubt that they succeeded admirably in this particular. At what period of their history the Egyptians began to mummify their dead it is impossible to say, but it is known for a certainty that, as far back as we have any knowledge of them, that is to say about 15.C. 4000 or 5000, they possessed the art of mummifying bodies, and also that, in the case of kings and high officials, they made use of an elaborate system of ritual and sepulture. It is possible, but not probable, that the aboriginal inhabitants of Egypt mummified their dead, but it is generally believed that the necessary anatomical knowledge, and the funeral customs, and the systems of sepulture which we now know were made use of by the Egyptians, were brought with them from their home in Asia.

The Egyptian believed that mortal man was composed of a perishable body called kha, a genius or "double" ka, the soul ha, and an intelligence khu. The ka, or "double," lived in the tomb as long as the body lay there. The soul left the body at death and went wherever it pleased, and passed in and out of the tomb according to its desire. After a period, the length of which is not exactly known, it returned to the body and entered and dwelt therein. It must be understood that only the souls of those who were victorious in the judg-

ment after death could re-enter their bodies; on the other hand it was absolutely necessary that the body should be preserved and kept in a perfect state, in order that it might be a fit dwelling-place for the "perfect soul" on its return. It is clear then that the Egyptians mummified their dead because they believed in the doctrine of the resurrection and immortality, and that they spared neither pains nor expense in making their "houses of eternity" meet dwelling-places for the souls who were to live for ever.

The name commonly given to the body of a human being, animal, bird, fish, or reptile which has been preserved by bitumen, natron, drugs or spices is MUMMY, and this name is derived, not from the old Egyptian word for an embalmed body, but from the Arabic word for bitumen, mûmîâ. The Arabs seem only to have become familiar with that class of bodies which had been preserved entirely by bitumen, and, in consequence, they called every embalmed body mûmîyya, i.e., a "bitumenized thing." From the Arabic the word has passed into all European languages, and it is only from the hieroglyphic inscriptions that we learn that the ancient Egyptian word for making a dead man into a mummy was

△ † or △ ← qes, which means literally,

The Greek historian Herodotus states that the Egyptians mummified the bodies of the dead in three different ways, and that the expense varied according to the system adopted. A later Greek writer, Diodorus Siculus, confirms this statement of Herodotus, and adds that the cost of embalming in the most expensive way was one talent of silver (about £240), that the cost of the second system was twenty minæ (about £80), and that that of the third was very little indeed. The bodies of the poor were merely steeped in natron for seventy days, and were then carried away for burial to holes dug perhaps in the loose sand of the desert, or to a common burial place or cave in the mountains, where they were piled up in heaps or laid in rows similar to those which may be seen in the mountain caves on the western bank of the Nile opposite to Luxor, the site of the ancient Egyptian Diospolis or Thebes. There is some doubt if the bodies of the poor were steeped in natron for as many days as seventy. In Genesis (l. 3) we are told that the physicians embalmed Jacob, and that "forty days were fulfilled for him; for so are fulfilled the days of embalming; and the Egyptians wept for him threescore and ten days." Now in an Egyptian document we find it stated that the embalming occupied 16 days, the bandaging 35 days, and the burial 70 days, i.e., 121 days in all. Elsewhere we are told that the embalming occupied 66 days, the arrangements for the funeral 4 days, and the burial 26 days, or 96 days in all; and again we are told that 70 or 80 days are required for embalming and ten months for the burial. It seems nearly certain then that the bodies of the poor were only steeped in natron long enough to dissolve the fleshy parts of the body, and we know that they were buried with a pair of sandals in which to walk in the world beyond the grave, and with a staff or stick to support their steps in the valley of the shadow of death.

The task of describing the details of every scene in the embalmment of the body of an Egyptian king or noble would be endless, for apart from the main facts common to the description of all mummies which were made according to the first and second systems of Herodotus, there are in each mummy a number of peculiarities which arose from individual taste or fancy on the part of the embalmers or the relatives of the dead. These, although extremely interesting to the student, need not be considered in describing the process of mummifying a priestly official, scribe, or

gentleman living in Thebes about B.C. 1600. after the death of a man his body was taken to the house of the embalmers, and the friends and relatives decided the details of the process and the price to be paid. It seems that the embalmers either formed a grade of the Egyptian priesthood, or that they were a body of men under the control of the priests; in either case all the ceremonial observances connected with the embalming of a body would be strictly carried out by them, for upon the performance of these depended the welfare of the deceased in the other world. The body was carefully washed and the brains were removed through the nostrils by an iron rod with a hook at the end, but great care was taken not to break the bridge of the nose in the process. The empty skull was then filled with a mixture of coarse spices and resin, or with pieces of linen which had been either steeped in aromatic or astringent substances, or smeared with unguents. When this process was adopted the hair and teeth were preserved. Skulls filled wholly with resin or bitumen are sometimes found. On the left side of the body, just over the groin, a line was then traced, along which an opening was made with a knife of flint or metal, and through it the great intestines and heart, etc., were removed. The interior of the body was then washed

with palm wine, and the whole hollow was filled with fragrant and preservative spices and gums. A cheaper way of ridding the body of its most easily decaying portions was to inject natron and oil of cedar; after a certain time the intestines were dissolved and little except the skin and bones remained. In the earlier dynasties the bodies of the dead were preserved by means of natron and bitumen, but in the later dynasties bitumen alone was used. Bodies preserved by bitumen lose their hair, teeth and nails, and the skin and bones become of a dark-brown or black colour.

Concerning the fate of the intestines Greek writers have differences of opinion. According to Herodotus they were in many cases destroyed by natron; and according to Plutarch they were shown to the sun as the cause of all the sins which the deceased had committed, and then thrown into the river; and Porphyry, confirming the statement of Plutarch, gives the formula which the embalmers used when exposing the intestines before the sun, according to which the deceased begged the sun and the other gods who grant life to man to allot to him an abode with the immortal gods, and confessed that he had worshipped the gods of his country with reverence and fear from his youth up, and that he had neither

killed nor injured any man. We now know, however, that after the intestines were taken out of the body they were washed in palm wine, anointed with unguents and sprinkled with spices and gums, and placed in four stone or wooden jars, upon which the covers were firmly fastened. These four jars are usually called Canopic, and this name has been given to them because the early Egyptologists compared them with the jar with small feet, thin neck, swollen body and round back, under which form it is said that Canopus, the pilot of Menelaus, who was buried at Canopus, was worshipped in that city. These jars were dedicated to four genii of the underworld, who were under the protection of four deities, and who represent the four cardinal points; these genii are called either "children of Osiris," or "children of Horus." The four genii were called:-

The first jar had the head of a man, and held the stomach; the second had the head of an ape, and held the smaller intestines; the third had the head of a jackal, and held the heart; and the fourth had the head of a hawk, and held the liver. These jars were under the protection of Isis, Nephthys, Neith, and Serqet, and represented the south, north, east, and west respectively. The greatest care was taken to preserve the intestines, for the loss of them, or even of one of them, would deprive the deceased of life in the world to come.

After the body from which the intestines were removed had been filled with gums, spices, etc., the cutting in the side was sewn up, and an amulet of the utchat , or eye of Horus, made of metal, stone, or porcelain, was laid upon it, and a ring, in the bezel of which a scarab was inserted, was placed upon one of the fingers. On the breast of the body, immediately over the heart, or near the neck, a green jasper, or green basalt scarab was fixed, either by bandages or by a torque and chain. This scarab was set in a frame of gold, and across the back, and down the back between the wings, were bands of gold.

The scarab, or beetle, is the emblem of the god Khepera, who typifies the last moment of night which immediately precedes the first moment of the new day, in other words he typifies the state of matter which is immediately about to come to life,

or to develop itself from one state of existence into another. The god Kheperå, , created himself, and everything that exists in earth, air and sky from emanations of his own body. He rolled the egg of the Sun across the sky day by day, and the custom which the beetle (Ateuchus Aegyptiorum) has of rolling its eggs made up into a ball along the ground, no doubt suggested this insect as a pictorial representation of the god. Moreover, this class of beetles was thought to consist entirely of males, and this was a further ground for comparing it with the god Kheperå.

The green basalt scarab intended for the breast of a mummy is inscribed with the 30th chapter of the Book of the Dead, a composition which is said by its rubric to be as old as the time of Mycerinus, a king of the IVth dynasty, about p.c. 3633. This chapter is called, "Chapter of not allowing the heart of a man to be repulsed in the underworld," and has reference to the judgment of a man before Osiris, the king and judge of the dead, when his heart was weighed in a balance. Osiris presided over the scene, and the four children of Horus who protected the intestines of the deceased, stood before him; and all the great gods were present at the trial. The heart of the man  $\mathfrak{T}$ , was placed in one pan of the scales,

and the feather \( \begin{aligned} \), emblematic of right and truth, in the other; a cynocephalous ape 3, sat upon the support of the beam to watch the indicator on behalf of Thoth, the scribe of the gods, and to declare to him whether the beam was exactly straight or not; Thoth himself stood near to register the result for the gods, and Anubis, the god of the dead, also carefully watched the indicator of the balance in order to dispute the result stated if necessary. Behind these gods stood a beast, part crocodile, part lion, part hippopotamus, called Amemit, or "Eater of the dead," i.e., eater of the damned. On the other side of the scales were present the soul of the deceased, his Shai or "luck," an object connected with his birth, and the two goddesses Renenet and Meskhenet, who presided over his birth and childhood and education. When the heart of the deceased exactly counterbalanced the feather of right and truth, Thoth declared to the gods that the weighing was satisfactory, the gods pronounced the deceased victorious, and he was led into the presence of the god by Horus, son of Osiris, and was free to go wherever he pleased in the underworld. Meat and drink were to be given to him daily, an everlasting estate was to be allotted to him in the Sekhet-Aanre or Elysian Fields, together with the necessary corn and barley for sowing it, and he was to be at liberty to come into the presence of the great god Osiris whenever he wished to do so.

The inscription upon the green basalt scarab is an address by the deceased to his heart, and reads:—

"O my heart, my mother! O my heart, my mother!
O my heart of my existence! May there be no obstacle raised against me in (or by) the evidence.
May there be no repulse to me by the children of Horus.\*
Mayest thou not be separated from me in the presence of the Guardian of the Scale. Thou art my double in my body, the god Khnemu who maketh my limbs sound and healthy.

Mayest thou come forth to the felicity to which we go thither. May the Shenit who make men to be established not overthrow our name. May the god Setem cause us double joy of heart when deeds and words are tried in the balance. May no falsehood be uttered against me near the god in the presence of the great god, the lord of the underworld. How great art thou rising up in triumph!"

When the amulet *utchat* , the ring, and the large green scarab had been placed upon the body, pieces of obsidian were laid in the sockets of the eyes, the nostrils were plugged with pledgets of linen, and the bandaging of the body began. Each bandage had a special name, and upon each was drawn in ink

<sup>\*</sup> Or the deities who attend upon the great gods.

a figure of the god who was believed to take under his protection that part of the body around which it was to be twined, and certain words invoking his aid were written by his side. While the bandaging was going on, one of the embalmers recited formulæ containing addresses to the gods who presided over the different limbs of the body. The bandages were made of linen, and varied in width from three to ten inches; one edge of each was gummed. were dipped in water and then turned deftly around the fingers and toes, and the gummed edges caused them to adhere to each other. The hands and arms and feet and legs were next treated, and when pads of linen had been laid above the feet to prevent the breaking of the mummy when made to stand upon its feet, and upon other parts of the body, the head and face, the back and shoulders, and the abdomen (upon which the arms and hands had been made to lie) and legs, were bound round with bandages made of many folds of linen, which were kept in their places by narrow strips of linen wound round the body at intervals of six or eight inches. When the body had been bound up in all the horizontal and perpendicular bandages prescribed by the embalmers' directions, it was sewn up in a piece of thick coarse linen over which a pinkish-brown fine

linen covering was tied, and the bandaging was complete. Sometimes passages and whole chapters from the Book of the Dead were inscribed upon the bandages, and often amulets were laid between them. The principal amulets were the red jasper buckle ,, which typified the blood of the goddess Isis, and which was laid upon the neck; the tet if, emblem of the god Osiris; the vulture , an emblem of the protection of Isis; the collar a, which was laid on the neck of the deceased; the uatch sceptre 1, emblem of a renewed and vigorous life; the pillow K, to "lift up" the head of the mummy; the heart  $\nabla$ , emblem of the conscience; the crux ansata  $\uparrow$ , emblem of life; the two utchats, one facing to the right , and the other to the left , but both symbolizing "good health"; the nefer  $^{\dagger}_{0}$ , emblem of "good luck"; the shen Q, emblem of the sun's course in the sky; the rising sun in the horizon o, the menat on, symbol of joy and health; the neha , emblematic of "protection"; the frog S, meaning "myriads," and "renewed life"; the serpent's head, emblematic of the opening of the mouth and eyes of the deceased in the underworld; and the two fingers.

In the earliest period of the history of Egypt the method of embalming seems to have been less

elaborate, and the bandages are neither so numerous, nor are they so well or so carefully put on the body. The greatest perfection in embalming was reached at Thebes about B.C. 1700. The mummies of this period are beautifully made, and all the limbs are pliant and may be handled without breaking. About B.C. 1000 it became the fashion to put the mummy into a brightly painted cartonnage case, which was fastened up the back by sewing. About B.C. 350, the Egyptians began to put the head of the mummy into a gilded mask, and to lay a hollow-work cartonnage pectoral upon the breast. The use of bitumen in the process of embalming became more frequent and extensive, and the decorations consisted of poorly written texts badly copied, and distorted figures of the gods and mythological scenes. In the Græco-Roman period the whole mummy was sometimes covered with a thin layer of plaster upon which imitations of ancient Egyptian mythological scenes were painted in bright colours or gold; the inscriptions are sometimes written in Greek. In the early centuries of this era the outer coverings of mummies of wealthy people were made of silk; examples of these are found chiefly at Akhmîm (Panopolis).

The mummy of a high priestly official, or gentleman, at Thebes in the XVIIIth dynasty was laid in a

sycamore wood coffin made in the form of a mummy, i.e., the god Osiris. The bottom and each side were made of single pieces of wood pegged together, and the rounded head-piece was cut out of a solid block of wood. A face carved out of very hard wood and a pair of hands were pegged on to the cover, and a solid foot-piece was also firmly fastened to it. In the face obsidian eyes and bronze eye-lids were sometimes inlaid. The inside and outside of the coffin were covered with a thin layer of plaster, upon which the artist and scribe painted in bright colours mythological scenes, figures of the gods, addresses to the deceased by the gods, and their answers, and extracts from chapters, or whole chapters of the Book of the Dead. The outside of the cover was ornamented in a similar manner, but the inside was usually left plain, and in such cases a flat, thin, wooden covering, made the exact shape of the mummy, and having a carved face and painted with inscriptions and mythological scenes, was laid immediately upon the mummy. The cover was fastened to the coffin by wooden dowels, through which pegs were driven, and the space between the coffin and the cover was filled up with liquid plaster. The mummy with its coffin was then placed in a large, heavy, wooden coffin, made in the same shape, and

painted much in the same way, and was ready for burial.

The scenes painted upon Egyptian papyri and tombs illustrate with great detail the funeral procession, a brief description of which is as follows:-The coffin containing the mummy was placed in a boat built on a sledge, and, escorted by priests, mourners, wailing women, and attendants carrying funereal furniture, offerings, etc., was drawn to the river bank by oxen. Here the procession embarked, and in a short time arrived at the western bank, in the mountains of which the Egyptians usually built their cemeteries. Then the procession was re-formed and began to make its way to the mountains opposite Thebes. The mummy upon its bier was drawn along by oxen guided by drivers, and in front of it walked the sem priest wearing his characteristic dress the panther's skin, burning incense and pouring out libations as he went. Behind followed other priestly officials, and near them came attendants bearing a couch, a chair, vases of unguents, flowers, offerings of meat and drink, sepulchral boxes, and other objects, the number and variety of which depended upon the wealth and position of the deceased. In the company was a band of women who uttered cries of grief, and struck their faces and breasts with their hands.

When the procession had arrived at the tomb, the mummy or a statue of the deceased was placed in an upright position before the door in order that the relatives might take their final farewell of him, and the ceremony of "opening the mouth" be performed. Tables loaded with offerings of cakes, beer, fruit, flowers, etc., were laid out before him, and a bull was slaughtered; an attendant called the "butcher" then cut off one of its haunches, and brought it and held it to the nose of the statue. The sem priest next took four instruments, and with each in its turn touched its mouth and eyes, while the kher-heb priest, having his hair whitened, read the portions of the funereal ritual appropriate to each act from a roll of papyrus. The eyes and the mouth of the deceased had been closed by the process of embalming, and unless the use of these members was restored to him he could neither see nor speak in the netherworld. The sem priest by touching the mouth and the eyes of the statue with the iron instruments made in the shape of , did for the deceased what certain of the gods did for the dead god Osiris; he thereby regained the use of his intelligence, and was able to talk with After the ceremony of "opening the the gods. mouth" had been performed, the lips of the statue were anointed with oil, a number of boxes of purification and an ostrich feather were offered to it, and it was draped in the *nemes* cloth  $\int$ ; the *kher-heb* read meanwhile the proper passages from the liturgical roll. After the slaughter of another bull and the presentation of a number of offerings the funereal ceremony was complete.

The form of the Egyptian tomb varied at different Among the poorest classes it was cusperiods. tomary to bury the bodies of the dead in graves dug in the sand, or in shallow holes made in soft limestone, or in caves, where hundreds of bodies were laid together. In the early dynasties the Egyptians built their tombs at Sakkarah in the form of heavy rectangular buildings, the walls of which slanted inwards towards their common centre; these structures vary in size from 170 ft. × 90 feet × 30 ft. to 26 ft.  $\times$  20 ft.  $\times$  13 ft., and are built of brick and stone. The name commonly given to a tomb of this description is mastaba, because it resembles the "bench" upon which Orientals recline and sleep. The interior of the mastaba tomb consists of three parts, the upper chamber, the serdáb, and the pit. In the upper chamber, opposite the door, which is on the east side, is a stele, at the foot of which is usually a stone altar with offerings upon it. serdab is a hollow, built in the thickness of the wall,

in which a stone statue was placed; semetimes this hollow is covered up with flat stones, but sometimes a narrow passage a few inches wide leads from it to the upper chamber, and it is thought that it was made intentionally to allow the smoke of the incense to penetrate to the statue within the hollow in the masonry. The pit was a perpendicular shaft which led from the upper chamber to the sarcophagus chamber, which was hewn out exactly beneath it. This chamber was approached through a small passage just sufficiently large to allow the sarcophagus to pass along it. When the mummied body had been laid in the sarcophagus, with perhaps a pillow \( \square\), and a few vases, the cover was fastened on by cement, the passage leading to the sarcophagus chamber was walled up at the end which opened into the pit, and the pit was filled up with stones and sand. The walls of mastabas are frequently ornamented with scenes which had taken place in the life of the deceased, and with representations of the making of funereal offerings, which are explained by short hieroglyphic inscriptions.

Other forms of tombs in use among the Egyptians during the earlier dynasties were the Pyramids, which were reckoned among the wonders of the world. The largest or Great Pyramid of Gîzeh was built by Cheops, the second king of the IVth dynasty, about B.C. 3733; the Second Pyramid of Gizeh was built by Chephren, the third king of the IVth dynasty, about B.C. 3666; and the Third Pyramid of Gizeh was built by Mycerinus, the fourth king of the IVth dynasty, about B.C. 3633. The pyramids at Ṣaḥṣârah, Abuṣîr, Dahshûr and other places usually formed the tombs of kings and of members of the royal families of Egypt.

The tombs of Upper Egypt during the XIIth and following dynasties were built in modified forms of the mastaba, and always contained the equivalents of the upper chamber, serdâb, and pit, whatever might be the order of their arrangement. They were usually hewn out of the mountains, but whenever a stony plain was near at hand, as in the case of Abydos, the Egyptians dug tombs therein. The finest examples of tombs hewn out of the solid rock are found at Thebes, and of these the most remarkable are those of the kings of the Middle They consist of long slanting corridors, terminating in halls and chambers, the walls and ceilings of which are ornamented with inscriptions, mythological scenes, figures of the gods, etc., all painted with admirable taste in bright colours. tombs of high officials those of Rekh-ma-Ra, Nekht,

and Peṭā-Amen-apt may be taken as excellent examples.

Excavations and discoveries in Egypt have shown that tombs were used over and over again, and that it is possible to find pottery and other objects, which were made at a period after B.C. 550, in a tomb, the walls of which are covered with inscriptions and scenes which prove that it was made for an ancient Egyptian official who lived during the rule of the VIth dynasty, some 3000 years before. It seems to have been the custom not to erase the inscriptions, etc., provided for the first occupant of a tomb, but there is no doubt that his body was removed to another place, and so made way for a successor. The circumstances under which such removals were made are not known, but it is probable that the priests by right took possession of tombs upon the extinction of the family to which the dead who were buried in them belonged, or by purchase when the surviving relatives could not afford to pay for the customary funereal offerings, which it was their duty to present at certain seasons of the year. Another danger which menaced the peace of the occupant of the tomb arose from thieves, who if they did nothing worse, forced open the coffin and carried off all objects made of gold or precious stones, and such

portions of the funereal paraphernalia as could be sold for other burials. In the XXth dynasty the government of Egypt was obliged to prosecute a number of men who devoted their lives to breaking into the tombs of the kings at Thebes and robbing them, and there seems little doubt that the removal of the bodies of kings and members of royal families to Dêr el-baḥari arose from the existence of an organized party of malcontents, whose wish was to loot the splendid tombs where the kings of old slept their last sleep. Tombs which were found with comparative ease were wrecked and robbed by invaders of Egypt, the Persians and others, but it is probable that the greatest harm was done to many of them by the fanatical Egyptian Christian ascetics who took up their abode in them. In the mythological scenes and figures of gods which were painted on the walls they saw heathen abominations and devils; and in the statues of the dead which loving friends had placed in the tombs they saw idols which their zeal prompted them to destroy utterly. Sometimes these recluses lived in tombs in which hundreds of mummies were piled up, either with or without coffins, and there are legends extant from which we learn that certain very holy men held conversations with mummies, and that they promised

to pray to Christ to release them from the Gehenna of fire.

On entering an Egyptian tomb one of the first objects visible was a slab of stone, usually rounded at the top, upon which was inscribed a figure of the deceased adoring a god or gods, and below was an inscription in hieroglyphics setting forth his rank and position, and containing prayers to the gods Osiris and Anubis that they would grant to him sepulchral offerings of food, drink and clothing. Here is a specimen of a prayer from a stele. "May Amen-Rā, lord of the thrones of the North and South, Ptah-Seker-Osiris, Un-nefer, lord of the passages of the tomb, grant a royal oblation. May they grant sepulchral meals, and oxen and ducks, and linen bandages, thousands of all good and pure things, thousands of all sweet and choice things, the gifts of heaven and the products of the earth which the Nile bringeth forth from his storehouses. May they grant the breathing of the sweet breezes of the north wind, the eating of bread, the gathering of flowers, and the receiving of food in felicity from the produce of the Elysian Fields. May I walk upon the everlasting road of the beautiful dead, the genii, and the noble ones, making whatsoever transformations I please among the followers of Un-nefer, and going in and

coming forth from the underworld. May my soul be not turned back when it ariseth to come forth, may it come forth as a living soul, may it drink water drawn from the depths of the river, may it receive the cakes of the lord of eternity, may it come into the presence of the god every day. May my soul light upon the branches of the trees which I have planted, may I refresh my face beneath my sycamores, and may I have my mouth wherewith I may speak like the followers of Horus." Sepulchral inscriptions are often of the highest importance, for they record historical facts which would otherwise be unknown.

Another important object in the tomb was the ushabti figure, which was placed either in a special box or upon the floor, and was intended to perform for the deceased whatever agricultural work he might be called upon to carry out in the underworld. The ushabti figure is made of granite, diorite, limestone, painted terra-cotta, faïence glazed blue, green, brown or white, wood and other substances. It is made in the form of a mummy with its hands folded upon its breast; in one hand it holds a mattock, or hoe, and in the other the cords of a basket, which it carries over one shoulder. The inscriptions are either cut or traced upon it in ink in the hieroglyphic

or hieratic characters: the text is that of the VIth chapter of the Book of the Dead.

In or with the mummy in its coffin, or in a separate place in the tomb, was placed a roll of papyrus inscribed in the hieroglyphic or hieratic characters, with a number of chapters selected from the great collection of religious texts to which the name of "Book of the Dead" has been given. Egyptian its name is proper em hru "[The Book of] coming forth by day," and it is said to be the work of the god Thoth. This book contains hymns to the gods, formulæ which will enable him to overcome the beings who would attempt to impede his progress in the underworld, prayers to the great gods in that region, and texts to be inscribed upon amulets, ushabtiu figures, etc. Extracts from it were written upon bandages, coffins, sarcophagi, the walls of the tomb, and other objects, and these gave the persons for whom they were written power to overcome all foes and obstacles.

### THE COFFIN OF AN-HERU.\*

1. Rectangular wooden coffin of An-heru, a high priestly official, who flourished at Thebes about The cover and coffin are formed of pieces of wood about three inches thick, which are joined together by pegs, and save for a few marks of the tools which were employed to force open the coffin in modern times, are in a perfect state of preservation. The inscriptions on the outside are in hieroglyphics painted green, and the edges of cover, sides, and ends are decorated with a black and white border. The inside of the cover is quite plain, but that of the coffin is covered with lines of inscriptions in hieroglyphics which contain prayers for funeral offerings; pictures of objects which form funeral offerings, and articles of personal apparel; and a number of chapters of a very ancient version of the Book of the Dead, written in hieratic. The titles of the chapters are in red. Along the bottom of the

#### THE COVER.

**2.** Coffin and cover of an unnamed priest of Amen-Rā, painted with mythological scenes and explanatory inscriptions, which belong to a period between B.C. 1000 and B.C. 700.

The cover, like the coffin, is ornamented with mythological scenes and inscriptions, usually painted in red, light and dark green upon a yellow ground. The pupils of the eyes and the whiskers are black, the nose is perforated, and the ears are well carved; the beard is wanting. A heavy head-dress falls on each side of the face, and under the ends are solid wooden hands which are pegged on to the breast; the pectoral is elaborately painted to imitate rows of

- 12, 13. The deceased adoring Tmu.
- 14, 15. A hawk-headed deity with table of offerings.
- 16, 17. Anubis seated on a throne, and mythological emblems.

The inscriptions in paragraphs 6 and 7 contain

prayers to Rā, Isis, and Nephthys that sepulchral offerings may be made to the deceased.

On the edges of the cover are two lines of hieroglyphics which read:—

The above inscriptions are prayers that Rā and Osiris will give to the deceased abundant sepulchral offerings, and they contain some interesting titles of these gods.

#### THE COFFIN—OUTSIDE.

Beautifully painted coffin of a member of the confraternity of Åmen-Rā, king of the gods, at Thebes, made probably between B.C. 1000 and B.C. 700, in imitation of the coffins in which members of the order in the XVIIIth dynasty were buried. Though exceedingly bright the colours are very harmonious, and the accuracy of the drawing and the excellence of the execution make this beautiful object one of the most striking of its class. The inside of the cover, and both inside and outside of the foot are unpainted. At the head is painted in outline a deity wearing a disk rising out of the top of the buckle ; on each side is a \*\*Itel\*, surmounted by the crown \*\*U. The upper edge of the coffin is ornamented by a series

of uræi MMM. On the right side, beneath this line, is an inscription, partly defaced, which reads:

"[May all the gods] dwelling in Hermonthis, and "Ptah-Seker, the lord of the hidden place, and Isis "the great lady, the divine mother, the daughter of "Rā, the mistress of Åmentet, grant thee a following "of the lords of the underworld, triumphant, as unto "the followers of Horus. May the underworld and "the pylons thereof be opened to thee, mayest thou go in among the divine company like the shining ones who live in Tattu, and may they grant thee

"offerings of tehefa food, oxen, ducks, incense, linen bandages, wax, honey, and every [good] thing of heaven and of earth. And may Osiris, the lord of eternity, who liveth among those of the east and those of the west, grant to the Osiris the libationer and reader of the place of truth offerings and funeral meals."

The scenes below this line are as follows:-

- 1. The deceased adoring Osiris.
- 2. Isis, winged, and a god seated in a shrine; the inscription reads: \\ \times\_{\infty} \time
- 3. Nephthys, winged, and a god; the inscription reads:
- 4. The deceased, making offerings to a seated jackal-headed god wearing 7; a jackal-headed god and the goddess of the west making offerings to a seated god. The inscriptions read: 1.

## THE MUMMY AND COFFIN OF NES-AMSU.

Wooden coffin, in the form of a mummy standing upon a pedestal, made for Nes-Åmsu, a priest and prophet of the god Khonsu at Apu,\* about B.C. 300.

This fine example of coffin manufacture at Panopolis is decorated with a number of scenes and inscriptions, the greater number of which are painted in red, light and dark green, white, blue and black upon a light yellow ground. The designs are characterized by great freedom and boldness, and the accurate drawing of many of them calls to mind the finest Theban work of the XVIIIth or XIXth dynasty. The hieroglyphics have, at times, almost a cursive

<sup>\*</sup> The Panopolis of the Greeks, and Akhmim of the Arabs. This city, which is situated about 320 miles south of Cairo in Upper Egypt, was celebrated for its linen manufacture, and for the skill of its inhabitants in cutting and polishing precious stones.

form, and the greater number of them are traced in outline. The head-dress is painted a dark green, the face and ears are gilded, and the eyelids and eyebrows are inlaid with that kind of blue glass which is characteristic of the period subsequent to the XXVIth dynasty. Over the forehead is painted a beetle, the wings of which are extended, and they bend down round the sides of the face; above the beetle is shen  $\mathbb{Q}$ , the emblem of the circuit of the sun, or eternity. The beard was broken by the Arabs, but it has now been repaired. The breast of the mummy is ornamented with a pectoral painted to imitate rows of lotus and other flowers, and pointed pendants, etc., hanging from a bar which is intended to represent inlaid work; from each end of this bar rises a head of the hawk of Horus surmounted by a disk painted red and a uræus 10.

The space to the right and left of the pectoral and immediately beneath it is filled with the following:—

- 1. A kneeling figure of Nut with outstretched wings and arms, wearing a disk upon her head; in each hand she holds an ostrich feather  $\beta$ .
- 2. The *utchat* facing to the left  $\Re$ , and the *utchat* facing to the right  $\Re$  (these are typical of the two eyes of the Sun, for the one is the emblem of the Sun

and the other of the Moon); the ram of Mendes wearing horns, disk and plumes , standing upon a support ; and the emblems of the East and the West,  $\frac{1}{2}$  and  $\frac{5}{4}$ .

Arranged in perpendicular lines over the left breast of the coffin is an inscription which informs us that the deceased Nes-Amsu, The held the dignity of --- Seutcheb, and also that he was the second priest of the god Amsu. From the other texts on the coffin we learn that he was also a priest of Khonsu. He was the son of Pa-senetchem-ab, the grandson of Tche-hra, and the great-grandson of Ara; all these gentlemen had held the same rank and had performed the same duties in the temple of Amsu. His mother's name was Ta-ta-khensu-i, and she was a sistrum-bearer in the temple of Amsu. The inscription is an address to the goddess Mer-sekhet, a form of Hathor (?), and reads: "Hail [to thee], O mighty one in heaven, daughter of Ra, turner back of the Fiend, mistress of wrath, [lady of] Manu, regent (?) in the Mountain of the Underworld, lady (?) of life, Mer-Sekhet, mistress of sceptres and sistra, lady of the menat,\* president of the Great Double House,

May his limbs be gathered together for him, may his body be again knit together for him, and may he be victorious over [his] enemies. Come thou, and grant that his soul may be mighty in his body, do thou overthrow for him all his enemies, overcome . . . . . . for him, let them never rise up against him, let them never come against him to attack him." The hieroglyphic text reads:—

Arranged in perpendicular lines over the right breast of the coffin is an inscription which runs:— "Behold Osiris, the seutcheb, the second prophet [of Åmsu], the prophet of Khonsu, Nes-Åmsu, triumphant, the son of the seutcheb, the second prophet of Åmsu, Pa-senetchem-åb-en-āśt, triumphant, the son of the sistrum-bearer of Åmsu, Ta-khens-i, triumphant! "Stand thou up, Horus grant that thou mayest stand up. May the god Seb grant that he may see

stand up. May the god Seb grant that thou may see his tather in thee, in thy name of 'Prince of the Temple.' May Horus grant to thee . . . . all the gods, may he make thee to ascend to them, and may

they make brilliant thy face. Horus hath given to thee thy two eyes that thou mayest see with them. Horus hath given to thee thy enemies beneath thee, and he hath raised thee up there. Through him thou shalt never be cast down. Come thou to thy place [for] the gods have knit thy body together."

The hieroglyphic text reads:-

Immediately beneath the figure of Nut is a horizontal line of inscription which reads:—

em 
$$\chi$$
ut an man t'etta heh in the horizonw ithout [ceasing] daily for ever and ever.

The next division is occupied by a scene in which the deceased is shown lying upon a bier ; above him hovers his soul in the form of a human-headed bird, having its wings extended and holding Q shen, the emblem of the circuit of the sun in each claw. Beneath the bier stand the four jars which contain his mummied intestines (see above, p. 8). The inscription reads:—

neter hen sen Åmsu Nes - Åmsu the second prophet of Åmsu, Nes - Åmsu.

At the head of the bier kneels the goddess Nephthys, with her right hand raised to her face; the inscription referring to her reads:—

<sup>\*</sup> These lines are an extract from a section of the "Lamentations of Isis and Nephthys," the Berlin text (Papyrus No. 1425) of which reads:—

Behind her stand "Ḥāpi, making protection for Osiris,"\* and "Ṭuamāutef, making protection for Osiris, the *seutcheb* and second prophet of Amsu, Nes-Amsu, triumphant!"†

At the foot of the bier kneels the goddess Isis  $\sqrt[4]{}$ , with her left hand raised to her face; the inscription referring to her reads:—

Behind Isis stand Åmseth, who says, "I am thy son, Osiris,"† and "Qebḥsennuf, who maketh protection for Osiris, Nes-Åmsu, the *seutcheb* and second prophet of Åmsu, triumphant."‡

Below this division is an inscription written in horizontal lines down the centre of the cover, which reads:—

<sup>\*</sup> This line is written down the cover at the right hand side.

The four perpendicular lines of inscription contain a speech of the god Kheperi, and read:—

of his gods, and thou shalt come forth with splendour."

On the right hand of the horizontal inscription are figures of the gods Harmachis, Seb, and Horus, who "make protection for Nes-Amsu"; the first holds a crook and whip, and the second and third a whip only. On the left are figures of the gods Tmu, Khepera, and Osiris, who also "make protection for Nes-Amsu;" each god holds a whip in his hands.

On the left hand side of the cover are four perpendicular lines of hieroglyphics, which read:—

Below this inscription is a black and white bull bearing a mummy upon its back, and below this are four lines of hieroglyphics containing prayers for sepulchral offerings; as the text is practically the same as that given on the right side of the pedestal, it is not repeated here.

On the inside of the cover are painted in outline:-

- 1. The winged disk with pendent urai A, emblematic of Rā and Isis and Nephthys.
- 2. The vulture  $\sum$ , emblematic of the goddess Mut, holding in each of its claws shen Q, emblematic of the circuit of the Sun, and the feather  $\beta$ , emblematic of Right and Truth.
- 3. The winged scarabeus , emblematic of the matter of the dead body of the deceased about to come into a new existence.
- 4. The vulture of Mut, as described in No. 2.

On the inside of the lower portion of the coffin is a full-length figure of the goddess Nut drawn in black outline, and on the back is a large figure of tet, wearing plumes and horns , emblematic of the god Osiris. Down the edge, on each side, is a line of inscription in which a full genealogy of Nes-Amsu is given, and the following texts:—

The mummy of Nes-Amsu is 5ft. 5 in. long, and is in a well preserved condition. The head was originally covered with a gilded cartonnage face, and a small, clean-cut, hæmatite scarab was fastened to the breast; the handsome cartonnage face was presented to the British Museum\* in 1885, but where the scarab is I know not. The front of the mummy is ornamented with a painted and gilded cartonnage collar and hollow-work pectoral, down the centre of which runs a line of hieroglyphics which record the name, titles and genealogy of the deceased. ### No. 4.

Inner wooden coffin of a lady who probably lived towards the end of the period of the XXVIth dynasty, about B.C. 500. The face, which is painted yellow, is made of a piece of hard wood pegged on the cover; over it falls a heavy head-dress painted in imitation of the handsome examples of an earlier period. The collar, or necklace, is roughly painted, and running down the cover is a line of hieroglyphics containing prayers for funeral offerings; these are almost illegible, and the name of the deceased is quite effaced. To the right and left of this line of hieroglyphics are marks which show that scenes in which the deceased was represented making offerings to the gods of the underworld have been painted there. Between the collar and the inscription is a winged disk with pendent uræi. All other parts of the coffin and cover are uninscribed, and are not ornamented. Preserved within the coffin are the remains of the cartonnage case of the mummy which belonged to the coffin. From Thebes.

Length, 6 ft. 2 in.

## No. 5.

Cover of a coffin of a lady who probably lived during the Ptolemaïc period, about B.C. 200. The whole style of this object proclaims the very late period to which it belongs, and it is evident that at the time when it was made the art of coffin-making had reached a low ebb. The body is flat instead of being convex at the chest and tapering away to flatness at the feet; the face is large, coarse, and ill-shapen, and the muddy green and red colours used in painting the figures of the gods show that the artist was as little skilled as the carpenter. The hieroglyphics are roughly traced in black upon a yellow ground. Beneath the collar are figures of the four children of Horus, the goddess Nut with outstretched wings, the golden hawks of Horus, a perpendicular line of hieroglyphics containing prayers for funeral offerings of meat and drink, and upright figures of Isis, Nephthys and other deities. From Length, 5 ft. 10 in Thebes.

#### Nos. 14—17A.

### CANOPIC JARS.\*

These jars or vases are found in sets of four, and each is dedicated to one of the four gods of the cardinal points—Mestha, Ḥāpi, Ṭuamāutef and Qebḥsennuf, who are sometimes called the "children of Horus," and sometimes the "children of Osiris." The first of these deities presided over the south and watched over the stomach and large intestines; the second presided over the north and watched over the small intestines; the third presided over the east and watched over the lungs and heart; and the fourth presided over the west and watched over the liver and gall bladder. Sets of Canopic jars have been found with coffins of the XIth dynasty.

# HYPOCEPHALUS OF SHAI-ENEN\* Mil 11/26.†

This interesting object is made of linen covered with plaster, and measures 8 in. in diameter; the inscriptions upon it are traced in black ink upon a yellow ground. The hypocephalus represented the "Eye of Horus," and was placed under the head of the mummy, in which it was supposed to keep warmth until the revivification of the body. The line of inscription around the edge reads:—

"I am the Hidden One in the hidden place. I am a perfect intelligence among the companions of Rā. I have gone in and come forth among the perfect souls. I am the mighty soul of saffron-coloured form. I have come forth from the underworld at pleasure. I have come, I have come forth from the eye of Horus. I have come forth from the underworld with Rā, from the House of the Great Old Man in Heliopolis. I am one of the beatified dead coming forth from the underworld; grant thou things for his body, and grant heaven for my soul and a hidden place for my munmy! I have come forth from the eye of Horus."

1. The text in the first division reads:-

"May the god, who himself is hidden, and whose form is concealed, who shineth upon the world in his forms of existence, and in the underworld, grant that my soul may live for ever."

- 2. In the second division are:—Nehabka offering to Horus-Amsu, the power of reproduction; a goddess with for a head; the cow of Hathor; the four children of Horus; a leaf (?) and two lions; a pylon surmounted by a ram's head and uræus, and having four rams' heads on each side; Rā and Kheperà.

From the text below we learn that the deceased Nekau was the son of Nes-Amsu, and the grandson of T'et-hra, and that all three men held high priestly positions in the town of Apu or Panopolis. lines 18 ff. Nekau is said to be the son of Nes-Amsu, the son of T'et-hra, the son of Nes-Amsu, the son of T'eṭ-ḥra, the son of Ḥeru . . . . , the son of Ṭāf-mutqebt, the son of T'eṭ-Ḥeru-af-anχ, the son of T'eṭ-ḥra, the son of the lady Nes-urt, who was herself the daughter of the ut'eb of Panopolis. Thus we know the ancestors from whom Nekau traced his descent for eight generations. Nekau's paternal grandmother was Nes-urt, and he himself is described in his stele as a "royal relative"; he was the ut'eb of Panopolis, a prophet of Horus and Isis (?), and he served with the priests monthly in the fourth grade. His father held the like offices, but he seems to have been in addition a "prophet of Osiris and of the two Horus gods, and a prophet of the ceremonials of Pharaoh, may he live for ever"! The greater part of the

inscription on the stele is, however, occupied with extracts from the hymns to Rā which are usually found in versions of the XVth Chapter of the Book of the Dead; the extracts seem to have been chosen at random and mistakes occur here and there. Speaking generally, the deceased prays that the gates of heaven may be opened before him, that his soul may go into the presence of Rā, that he may be among the never-setting stars, and that his whole course of life after death may be like that of Rā.

Behind him stand the gods Harpocrates , Atmu , Heru-netch-hra-f , and the goddesses Isis and Nephthys; each god holds the sceptre in his left hand, and in his right, and each goddess holds a lotus sceptre in her left hand and in her right. The legends above the deceased and the deities whom she adores are as follows:—

Ta-hebt, triumphant, daughter of Heru-mes, triumphant, and of Khartet-Amsu, triumphant.

- 2. The first the great god, the prince of eternity."
- 3. Saith Harmachis, the great god, the lord of heaven."

The text begins, "May Osiris, the dweller in "Amentet, the great god, the lord of Abydos, and "Seker-Osiris, within Apu (Panopolis) and Heru-" xuti - Atmu, the lord of the lands of Annu " (Heliopolis) and Heru-net'-hrat-f, and Isis, the great "lady, the divine mother in Apu (Panopolis), and "Nephthys, the divine sister, and the great cycle of "the gods who dwell in Apu, give sepulchral meals, "oxen, fowl, incense, libations, unguents, linen "bandages, and all good, pure, and pleasant things "which the heavens give, and the earth bringeth "forth, and the Nile bringeth forth from his store-"house, and the sweet breeze of the north wind, to "the ka of the lady honourable before Osiris, who "dwelleth in the underworld, the great god, the lord "of Abydos, Ta-hebt, the daughter of Heru-mes, "triumphant, and of the lady Khartet-Amsu, " triumphant."

The deceased lady then saith:-

"Hail, Rā-Harmachis, the lord of rays, who shinest in the eastern horizon of the sky, shine thou in the face of Osiris Ta-hebt, triumphant."

"Ta-hebt singeth hymns of praise to Rā when he "setteth. Grant that the soul of Osiris Ta-hebt "may come forth with Rā into heaven; may it be "ordained for her to come into his boat when it goeth in among the stars which never rest in the "heavens."

The lady Ta-hebt then praiseth her lord of eternity, saying, "Hail to thee, Heru-xuti-Khepera, the "self-created one! Thou art doubly beautiful when "thou shinest in the horizon, thou illuminest the "world with thy beams, and the gods rejoice when "they see thee in thy heavens. The goddess Unnut "is on thy brow, and the crowns of the south and " north are upon thy head; the goddess taketh up "her place upon thy forehead. Thoth is established "upon thy prow to destroy all thine enemies in the "underworld. Let me come forth to meet thee and "to see thy beautiful Form. I have come to thee " for I would be with thee, and I would see thy disk "every day. Let me not be held back, let me not " be repulsed, let my limbs be renewed by the sight " of thy splendours even as are the noble ones who

"are favoured by thee, for I am one of those who "venerated thee upon earth. Let me arrive at the "land of eternity, let me attain unto the nome of "everlastingness. Guide thou me, O Rā, and do "thou give the sweet breath of life to me."

Following this petition is an address by Ta-hebt to every priest, and scribe, and official, entreating them when they pass along the way to her tomb to make mention of her name so that it may be proclaimed before the great god, the lord of the underworld, "for," saith she, "the person whose "name is mentioned liveth."

Of herself she then says, "My heart was right." I never put myself unduly forward; I gave bread "to the hungry, drink to the thirsty, and clothes to "the naked. My hand was open to all men. I "honoured my father and loved my mother, I was "affectionate to my brethren, and my heart was at "one with my fellow-citizens. I kept the starving "folk alive with provisions and clothes each year "that the inundation of the Nile was low." Nor did she confine her cares to the living, for she provided for the ceremonies which were performed for the benefit of those "whose souls had gone to heaven." She had trodden the divine path from her earliest childhood, and having rendered all praise and glory

to her God, and satisfied the priests His servants, she prays that He will establish her children in their places together with those who live for ever and ever.

### USHABTIU FIGURES AND BOX.

Ushabtiu is the name given by the ancient Egyptians to figures made of alabaster, wood, glazed faïence, etc., which were inscribed with the 6th chapter of the Book of the Dead, and placed in the tomb to do for the deceased whatever labours were decreed for him to perform in the underworld. These figures are made in the form of the god Osiris, i.e., in the form of a mummy; the two hands are crossed over the breast, the one holds a hoe and cord and basket, the other an instrument for digging. In the text the deceased addresses the figure, and says, "O ushabtiu, if there be any work apportioned to be done by Osiris (i.e., the deceased) in the underworld, may all obstacles be removed for him according to his desire." To this the figure answers, "Here am I ready whenever ye call." The deceased next says, "O ushabtiu, be ever watchful to labour, to sow the fields, to fill the canals with water, and to carry sand from the West to

the East." To this the figure answers, "Here am I ready whenever ye call." The hieroglyphic text reads:—

Àusar er ari kat neb arit en am

Osiris to do work any [which is] to be done there

em Neter xert au - tu hu set'ebu

in the underworld, be there smitten down obstructions

ka -  $\theta$ en [when] ye call.

### SCARABS.

In the south of Egypt, and in Nubia particularly, the traveller may frequently observe a greenish-black or black beetle toiling up a sand-heap, and rolling before it with its hind legs a ball, an inch and a half or two inches in diameter, made of dirt, in which it has wrapped its eggs. Naturalists have called this beetle Scarabæus sacer, and they consider it to be the type of Coprophagi or "dung-eaters." A remarkable peculiarity exists in the structure and situation of the hind legs, for they are placed very close to the end of the body, and when the beetle rolls its ball of eggs along it seems as if it stands upon its head, and as if its head is turned away from the ball. In this insect the ancient Egyptians saw an emblem of the Sun-god, who rolls his egg across the sky daily. Like him, it was supposed to have produced itself, for all beetles were males, and Horapollo and other writers affirm that a female beetle never existed. It was said to be

only-begotten because it was self-produced; it represented generation because of its supposed acts; and father because it was engendered by a father only; and world because in its generation it is fashioned in the form of a world; and man because there is no female race among them. From the Egyptian inscriptions we now know that the beetle, which they called ( Kheperå, was a symbol of the god ( , who was the "father of the gods," and the creator of all things which exist in heaven and earth. He formed himself out of the matter which he himself produced, and he was identified with the night-sun at the moment when it was about to rise for a new day, and thus typified matter about to change its form of existence, or matter about to come into existence, and resurrection and new birth generally.

On the flat base of the scarab the Egyptians engraved hieroglyphic texts, the names of gods, kings, priests, devices, *etc.* The funeral scarabs made of green basalt form a distinct class, and are of great interest. The finest examples are set in a gold border and have a horizontal band of gold across the back; the division of the wings is marked by a band of gold running at right angles to the horizontal band

to the end of the body. Green basalt scarabs were attached to the neck by gold or bronze wires, or chains, and they were laid immediately over the heart. The poorer classes of the Egyptians made use of green or blue glazed faience scarabs, which they either sewed upon the bandages, or fastened into pylon-shaped pectorals which they laid upon the breast of the dead. The green basalt scarab is usually inscribed with the text of the 30th chapter of the Book of the Dead, a composition which in its rubric is said to be as old as the IVth dynasty. For a running English translation of this chapter see supra, p. 12, and for the hieroglyphic text from the coffin of Nes-Amsu see p. 61 ff.

317. Green basalt scarab in its original gilded copper setting, inscribed with a version of chapter 30 so of the Book of the Dead. It is asserted that it belonged to the mummy for whom the coffin without name, which is described on pp. 30-41, was made; parts of the characters in the first line, which contains the name, are covered by the setting, but the signs are clear.
